Introduction

With our assortment of revulsive incontinence products, we as GHC German Health Care GmbH focus on an area, where our mission is to offer our customers an extensive range of different products as well as offering a very high level of expertise. And our customers can rely on that – Even during challenging times!

Within our product assortment, you will find a wide selection of transurethral and suprapubic balloon catheters, different catheter insertion kits, a wide range of urine collection systems and bags as well as bag holding systems and accessories.

We have positioned ourselves well for the future by having expanded our warehouse capacities, added a new warehouse management software as well as keeping up the high level of service orientation with various service offers. For example, we have created a customer portal where all relevant MDR-documents are available for you to view or download at any time. This service saves you a lot of time and gives you the benefit of always having access to all necessary documents.

In our current catalogue you will find new products that we have added to our assortment for our customers ranging from homecare companies, medical supply stores and clinics. For instance, we are introducing our new CARE *CON* series (page 38-40), which are Male External Catheters (MEC) in a very good and reliable quality at an attractive price. Further, we are introducing our new transurethral soft silicone balloon catheter (page 9), which due to the softer shaft material is an excellent alternative to the current balloon catheter range in the homecare market. Alongside that, we are implementing an additional new transurethral silicone catheter with a flute tip (page 14). This variant is a good solution for patients with problematic urine findings. Lastly, we also have implemented new suprapubic balloon catheters as alternatives (pages 25 and 29) to our previous product line-up. Besides the high product quality, we also wanted to enhance our delivery capabilities by adding the new products to our assortment.

With this catalogue we offer you an overview of the complete range of GHC's product portfolio. You are warmly invited to visit **www.ghc-medical.de** for up-to-date information.

If our offer has sparked your interest, feel free to get in touch with us.

We look forward talking to you.

Warmest greetings from the GHC management,

Dirk Dohmann

Kay Kruse

Quality Policy

German Health Care GmbH stands for innovative solutions in medical care of persons with physical disabilities. As an importer and distributor of products especially for the bladder management, we offer clinics, homecare providers and pharmacies a broad portfolio and individual solutions to improve the quality of life of your customers – whilst giving you the added safety of receiving high product quality as well as reliability.

Our own, extensive product range is thanks to the strategic cooperation with well-known manufacturers supplemented by established products. Due to our continuous exchange with our customers and the end-users, our products are not only in a state of steady improvement, but also new products are added to our assortment. Hence not only market-leading homecare providers value our high-quality product and services since several years, but also clinics and the purchasing communities of medical trade suppliers.

The production of GHC-products is guided by clear specifications of our manufacturers, based at different locations worldwide. To ensure the quality of the production processes, every production site is getting audited regularly. The manufacturers conduct quality controls directly after the production and before the goods gets shipped. The final inspections are conducted when the goods arrive at our high-bay warehouse in Wees. Before the GHC products are shipped to our customers, they get checked and tested extensively. Only perfectly produced products are getting released and our customers can rely on this strict quality policy.

This strict quality policy is also embedded in our quality management system according to DIN EN ISO 13485.

Not only can you rely on the quality of our products, but rather also on our employees, as they are the basis of our success. Our qualified medical device consultants in the back office as well as our field staff will gladly advise you on all questions concerning the GHC product portfolio and take care of it to process your requests as quickly as possible. Through continuous in-house workshops and further education as well as IT-supported processes we are guaranteeing this expertise, so that your inquiries, your orders, and your goods are processed as quickly as possible. You can count on that.

Ensure your incontinence supply quality by cooperating with GHC German Health Care GmbH, your system provider for revulsive incontinence care.

CARE *FLOW*
Transurethral 100% silicone catheter
2-way balloon catheter with nelaton tip

Product specifications:

- ✔ In CH sizes 06 – 10 the catheter comes with a stabilising guiderail.
- ✔ Due to the high balloon capacity of up to 30 ml, the catheter is safely fixed in the bladder.
- ✔ Use our blocker syringe containing 10% glycerine solution here.
- ✔ Excellent biocompatibility and high resistance to encrustation.
- ✔ The X-ray line allows for radiological imaging of the catheter.
- ✔ MRT – compatibility.
- ✔ The catheter can be used for long-term drainage.

CARE *FLOW*
Transurethral *Soft* 100% silicone catheter
2-way balloon catheter with nelaton tip

Product specifications:

- ✔ In CH sizes 06 – 10 the catheter comes with a stabilising guiderail.
- ✔ Very high wearing comfort, due to the soft-silicone material of the catheter shaft.
- ✔ Safe fixation of the catheter in the bladder due to the balloon.
- ✔ Use our blocking syringe containing 10% glycerine solution here.
- ✔ Excellent biocompatibility and high resistance to encrustation.
- ✔ The X-ray line allows for radiological imaging of the catheter.
- ✔ The catheter can be used for long-term drainage.

CARE *FLOW*
Transurethral 100% silicone irrigation catheter
3-way balloon catheter with nelaton tip

Product specifications:

- ✔ An atraumatic Nelaton tip ensures a smooth passage of the prostatic fossa.
- ✔ Optimal drainage and irrigation performance, due to two staggered drainage eyes.
- ✔ Excellent biocompatibility and high resistance to encrustation.
- ✔ Due to the high balloon capacity, the catheter is safely fixed in the bladder.
- ✔ Use our blocker syringe containing 10% glycerine solution here.
- ✔ The x-ray line allows for radiological imaging of the catheter.
- ✔ MRT – compatibility.
- ✔ The catheter can be used for post-operative long-term drainage.

CARE *FLOW* UNIBAL
Suprapubic *integral* 100% silicone catheter
2-way integral balloon catheter

Product specifications:

- ✔ The catheter is equipped with an integral balloon, resulting in an even thickness throughout the catheter. This ensures that there is no painful compression of the fascia during catheter placement.
- ✔ The catheter offers high patient comfort.
- ✔ High drainage performance, due to the high lumen and the central open tip.
- ✔ We recommend using or blocking syringe containing a 10% glycerine solution, for a safe fixation of the catheter
- ✔ Excellent biocompatibility and high resistance to encrustation.
- ✔ Short and central open tip.
- ✔ The x-ray line allows for radiological imaging of the catheter.
- ✔ MRT – compatibility.

CARE *FLOW* UNIBAL
Suprapubic puncture set
2-way *integral* balloon catheter

Product specifications:

The puncture set contains:
- 100% silicone integral balloon catheter
- Stainless steel cannula with special cut
- Scalpel with small handle

- ✔ *Integral* balloon catheter with seamlessly incorporated balloon into the shaft.
- ✔ Optimal use of the inside diameter of the cannula due to integral balloon catheter: Charrière 10 and 12 with split cannula CH 13.8 (4.6 mm), puncture length 120 mm. Charrière 14 with split cannula CH 16.8 (5.6 mm), puncture length 120 mm.
- ✔ High drainage performance, due to the high lumen and the central open tip.
- ✔ Safe fixation of the catheter, due to the integral balloon.
- ✔ Use our blocker syringe containing 10% glycerine solution here.
- ✔ The x-ray line allows for radiological imaging of the catheter.
- ✔ MRT – compatibility.

Central open tip, integral balloon

CARE *FLOW* UNIBAL
Suprapubic change set, incl. guidewire
2-way integral balloon catheter

Product specifications:

This charge set contains:
- 100% silicone *integral* balloon catheter
- Teflon-coated guidewire

✔ Integral balloon catheter with seamlessly incorporated balloon into the shaft.

✔ High drainage performance, due to the high lumen and the central open tip.

✔ Stable teflon-coated guidewire.

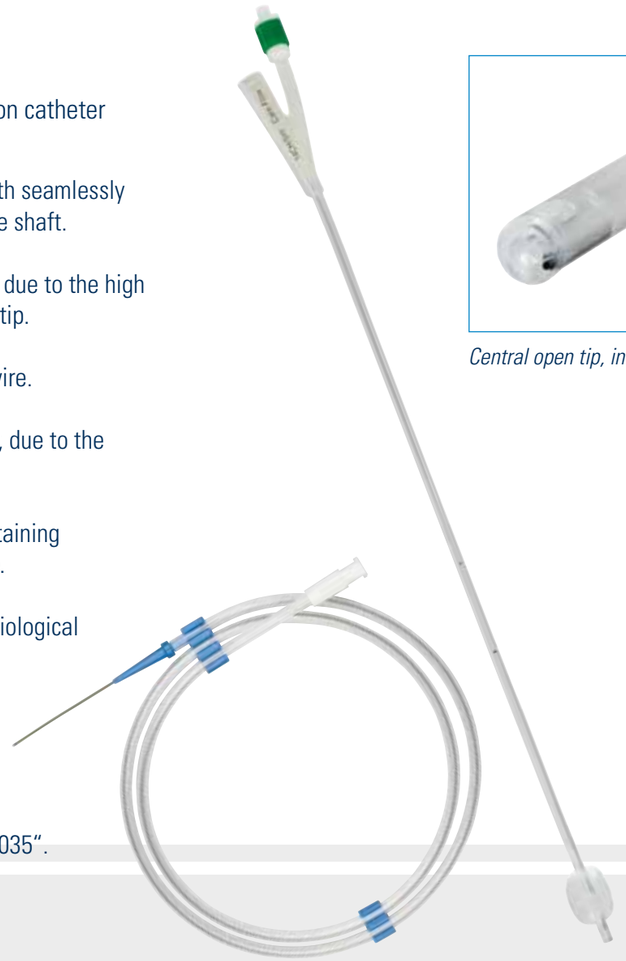

✔ Safe fixation of the catheter, due to the integral balloon.

✔ Use our blocker syringe containing 10% glycerine solution here.

✔ The x-ray line allows for radiological imaging of the catheter.

✔ MRT – compatibility.

✔ Teflon-coated guidewire, lenght 80 cm, 3 cm straight and flexible tip, thickness 0,035".

NEPHROSTOMY
Nephrostomy *integral* 100% silicone catheter
2-way integral balloon catheter with dilatation tip

Product specifications:

✔ Excellent biocompatibility and high resistance to encrustation.

✔ The catheters are suitable for long-term drainage.

✔ Dilating nelaton tip with central bore.

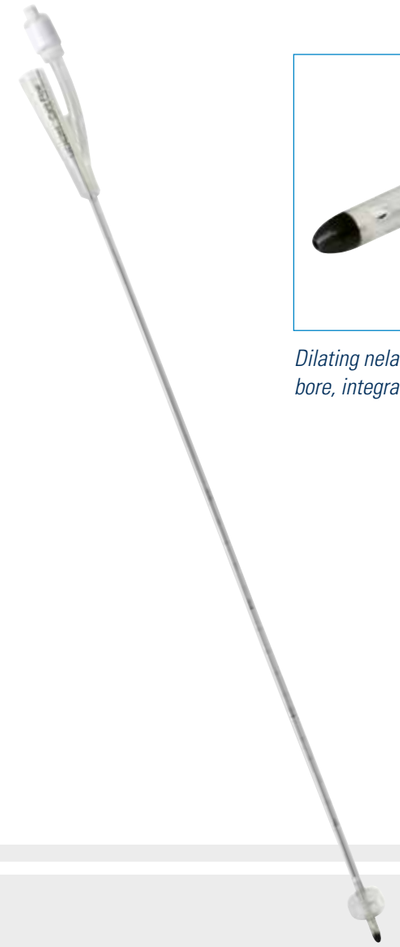

✔ High drainage performance, due to four drainage eyes located in front of and behind the balloon.

✔ The x-ray line allows for radiological imaging of the catheter.

✔ MRT – compatibility.

✔ Graduation marks to ensure an optimal placement.

✔ 100% silicone.

CARE *SET*
Catheter insertion kit Basic and Clinic

Product specifications:

- ✔ The Basic Set comprises an inner and an outer package.
- ✔ The outer package of the basic set contains:
  one sterile 10 ml syringe for unblocking the placed catheter.
- ✔ The items in the inner, sterilised package are used to place a new transurethral catheter.

Article	Article number	PZN
Basic	01/01/99/BS/GHC	01972188
Clinic	01/01/99/BSK/GHC	08845872

Components of the catheter insertion kit are:

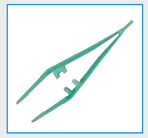

1 Tray

6 Swabs

1 Pair of tweezers

2 Underpads

1 Blocker syringe with 10% glycerine

3 Nitrile gloves

1 Fenestrated drape

Additional included in Basic set:

10 ml syringe

Packaging Unit: 20 pieces
Packaging: sterile

Additional equipment

Accessories for the catheter replacement

Next to our assortment covering catheters as well as drainage- and holding- systems, we also provide necessary accessories, to maintain a satisfactory supply of revulsive incontinence aids and ensuring an optimal replacement of a catheter, which all helps to maintain a high level of supply quality.

We want to highlight:

- The **blocking syringe containing a 10% glycerine solution, 10 ml** (Art.-Nr. 01/01/99/KB/10/GHC), ensures a steady volume in the catheter balloon during the wearing period, by preventing the liquid medium from diffusing out of the balloon. Thereby the balloon catheter stays fixated, and the risk of a dislocated catheter can almost be excluded.
- The **lubricant LUBRICARE, 6 ml** (Art.-Nr. 01/01/99/GG/001), adhere excellently onto the mucous membrane and has excellent lubrication properties, which ensures a smooth replacement of a catheter.

The below illustrated products are only an extract of our comprehensive assortment. We gladly provide more information upon request.

CARE CATH Liv
IC disposable catheter, hydrophilic, 17 cm
Ready for immediate use, Nelaton

Product specifications:

- ✔ Very good gliding properties thanks to hydrophilic coating.
- ✔ Ready for immediate use thanks to ready-to-use, hydrophilic coating.
- ✔ Atraumatic application due to rounded drainage eyes.
- ✔ Optimal length of 17 cm ensures complete bladder emptying.
- ✔ Non-contact application and good guideability due to the correct rigidity of the catheter.
- ✔ Good grip of the handle allows good handling, even with limited dexterity.
- ✔ Easy connection of urine collection bag and/or instillation solution via the handle cone.

CARE *CON* comfort | Typ I
Male External Catheter (MEC) 100% silicone
Self-adhesive

Product specifications:

- ✔ The CARE *CON* comfort captivates through its comfortable silicone material and good hold.
- ✔ The material thickness of the urinary sheath has been developed to cling softly and flexibly whilst ensuring a secure hold, which provides high safety.
- ✔ The stable connecting tube prevents the MEC from bending and ensures a secure connection to the urine bag.
- ✔ Small steps between the sizes ensure perfect fit.
- ✔ The medical grade silicone maintains the breathing activity of the skin.
- ✔ Due to the use of transparent materials, skin alterations or irritations can be observed at any time.
- ✔ With a shaft length of 8,0 cm and an adhesive area of 4,5 cm, the CARE *CON* comfort meets the requirements of most MEC-users.

CARE *FLOW* UB 4000TUR closed TUR irrigation bag system with pump ball for controlled post-operative bladder irrigation
Capacity: 4000 ml

Product specifications:

- ✔ Can be fixed safely and correctly to many different types of bed frames by means of the twin holder with fixing cord.
- ✔ Bacteria- and fluid-tight venting filters ensure permanent pressure compensation and provide for optimal drainage in the system.
- ✔ Due to controlled irrigation of the bladder with the pump ball integrated in the feeding tube, post-operative tamponade of the bladder can be avoided.
- ✔ A doghouse on the bag ensures safe and hygienic positioning of the drain tap.

Capacity	Tube length	Article number	PZN
4000 ml	120 cm	04/02/4000/TUR/GHC	06189004

Pump ball
The specific interaction of the pump ball and the two tube clamps allows to flush out blood clots in the bladder and tube system.

Profiled tube
The octagonal inner profile of the feeding tube assures excellent stability, but at the same time it is also flexible. A high lumen guarantees a safe drainage into the drip chamber in any situation.

Drip chamber
An anti-reflux valve divides the drip chamber and reliably prevents a backflow of urine and thereby obviates the risk against an ascending infection.

Drain tap in the doghouse
The special design of the piston in the drain tap ensures safe and easy operation and prevents leakages caused by improper use of the piston.

Packaging Unit: 10 pieces
Packaging: sterile

The **CARE *FLOW* BAG** is a cover for the **CARE *FLOW* UB 2000** serving as a discreet way to store the urinary bedside bag.

Product specifications:

- ✔ Thanks to the convenient Velcro fastening the cover can be affixed to the urinary bag quickly and easily. A second Velcro fastening on the front allows for a clean and uncomplicated extraction and reinsertion of the drain tap.
- ✔ The cover is made from 100% polypropylene (PP) and is thus resistant against organic acids.
- ✔ The cover is light grey, washable at 30° and hence reusable.

CARE *FLOW* UB 1000 Closed urine drainage systems
Leg bag systems for day & night
Capacity: 1000 ml

Product specifications:

- ✔ Closed urine drainage system
- ✔ Bacteria- and fluid-tight venting filters provide for permanent pressure compensation and optimal drainage in the system.
- ✔ A doghouse on the bag ensures safe and hygienic positioning of the drain tap.
- ✔ T-drain tap.
- ✔ Needle free sampling port.
- ✔ Clear gradvation marks.

Capacity	Tube length	Article number	PZN
1000 ml	30 cm	04/03/1000/30/GHC	06718885
1000 ml	60 cm	04/03/1000/60/GHC	06718891
1000 ml	90 cm	04/03/1000/90/GHC	06718916

Stepped connector
The special design of the connector steps provides for a reliable connection with the ring profile in the funnel end of the catheter. Needle-free urine sampling avoids needle injuries.

Fleece coating
The backside of the leg bag is coated with sweat-absorbing fleece. This effectively prevents irritation of the skin and considerably improves user comfort.

Drip chamber
An anti-reflux valve in the drip chamber provides for reliable prevention of urine reflux and highly efficient protection against ascending migration of bacteria.

Drain tap
The special design of the piston in the drain tap ensures safe and easy operation and prevents leakages caused by improper use of the piston.

Packaging Unit: 30 pieces
Packaging: sterile

Fixation for leg bags on page 51-56.

CARE *FIX*
Universal Velcro strap
Length can be individually adjusted

Product specifications:

- ✔ Universal leg bag holding band with two attached Velcro straps to go through the upper eyelets of the leg bag and a special sewn on fixation for the tube of the leg bag system.
- ✔ The elastic material ensures that disturbances of the blood circulation in the thigh and lower leg are prevented as far as possible.
- ✔ The Velcro strap is 70 cm long and can be cut to the individual length. So it can be used on the thigh and lower leg.
- ✔ This universal Velcro strap can be used for the following urine leg bag systems: UB1000, UB750/UB750US, UB750F/UB750UF, UB500/UB500US.

CARE *FIOW* und **CARE** *VENT* **catheter valve**
For an independent and controlled emptying of the urinary bladder

Product specifications:

- ✔ The optimal solution for mobile, independant users wearing a transurethral or suprapubic catheter.
- ✔ The catheter valve continuously trains the bladder muscles so that the bladder function remains completely intact. The emptying of the urinary bladder follows the user's personal rhythm. This sustainably enhances the quality of life.
- ✔ During the night the valve can be connected to a urine bag system by means of a firmly attached silicone tube.
- ✔ By flipping the lever of the flip valve by 180° the CARE *FLOW* catheter valve is completely opened as well as fixed in a safe position. This prevents an unintentional closing of the valve during the night.

Arrows indicate open / closed position
